See the [Dell Commercial Docks Family Brochure](#) for more information on our entire docking portfolio.

* Via single connection on the Dell Performance Dock WD19DC / WD19DCS, functionality reduced to single USB-C, the same as the Dell Dock WD19 / WD19S.

** Latitude Chromebook Enterprise notebooks are USB-C systems and the recommended dock is the Dell Dock WD19 / WD19S with 90W power adapter. The Dell Thunderbolt Dock WD19TB / WD19TBS and Dell Performance Dock WD19DC / WD19DCS are supported but functionality is reduced to single USB-C, the same as the Dell Dock WD19 / WD19S.

Precision 7000 series mobile workstations require more power than 130W, so when docked with the Dell Dock WD19 / WD19S (130W/180W) or Dell Thunderbolt Dock WD19TB / WD19TBS, the workstations need to be plugged in externally for optimal operation. For the best experience with Precision 7530/7540/7550 or 7730/7740 /7750, choose the Dell Performance Dock WD19DC / WD19DCS.

The WD19DC / WD19DCS dock comes with a dual USB-C connector that provides up to 210W of power delivery, so you no longer need an additional power adapter.
